Detailed Action

1. As a housekeeping matter, as no original claim numbered 36 is present in this application, claims numbered 37-44, have been re-numbered as claims 36-43, all pursuant to 35 USC 1.126.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-38 and 38-42, drawn to the method of and apparatus for compressing sludge, classified in class 100, subclass 37.
- II. Claims 34-37, drawn to a compressed sludge product, classified in class 44, subclass 551.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the sludge product pellet may be made by any number of conventional compressing means, standard in the art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
